

Submission / approval of nominations for the Kiemenai point

1. Nominations approval takes 2 hours!
2. The nomination per hour must match the available capacity per hour!
3. Nominations must be submitted to both operators equally if you want to receive the maximum desired value!
4. If the user does not submit a nomination to one of the operators by D-1 15:00, then 0 is confirmed in the system!
5. For RE-nomination per hour, the value can be submitted higher (over-nomination) than the available capacity per hour if the total constant capacity has been sold!
6. It is not possible to RE-nominate previous hour's + 2h!
7. If the nominations differ, the lowest submitted value per hour is accepted!

Example of how (re)nominations are approved when users have not submitted the same values
Gas day (D): 15.01.2026.

1.NOMINATION UNTIL 3:00 PM ONE DAY BEFORE GAS DAY (D-1)

1. Nominations have been submitted to the operators by D-1 till 15:00 (values for gas day D are fixed until the next submitted changes)

Values are "fixed", they can only be adjusted using RE-nomination

2.RE-NOMINATION DURING GAS DAY (D)

2.1. If the RE-nomination is submitted to both operators, it is possible to receive a confirmation for higher values than those approved so far:

Previously agreed values (Step 1), which cannot be RE-nominated according to the time when submitted

Submission time (rounded to the next full hour)
+ 2h

If the values have been agreed upon in advance, then by RE-nominating them to both operators, it is also possible to get larger values.

BUT

If sent to only one operator - RE-nomination is possible only for smaller amounts.

Submission time (rounded to the next full hour)
+ 2h

Since smaller values (170 000 and 0 in the last hour) were approved in Step 1, the RE-nominated value (175 000) is not approved. The RE-nomination is only approved for the submitted value of 165 000, which is lower than the value approved in Step 1 for the same gas hour (170 000).

2.2. If the RE-nomination is submitted to one operator, the smallest submitted value is confirmed in relation to the previously confirmed values:
